

ANALYTIC SUPPLEMENT TO SELF- EVALUATION REPORT

Tables and notes

FACULTY OF
ARCHITECTURE

INTRODUCTORY NOTES

The tables, that is, the data contained in this document are presented as they should appear in the Analytic Supplement, which is an integral part of the self-evaluation report of the higher education institution in the procedure of re-accreditation of HEIs. The data in the Analytic Supplement constitute evidence for the evaluation of one or more elements of the *Quality Standards in the Procedure of Re-Accreditation of Higher Education Institutions*.

The Analytic Supplement shall be prepared by the higher education institution in Croatian and English and shall comprise three parts:

- I.) Annex containing evidence on the fulfilment of minimal conditions pursuant to the provisions of the Act on Quality Assurance in Higher Education and Science (Official Gazette, 151/2022);
- II.) Annex containing learning outcomes of the study programmes;
- III.) Annex containing other information proving compliance with the *Quality Standards in the Procedure of Re-Accreditation of Higher Education Institutions*.

For all tables which require data to be added for an individual study programme, please see instructions above the table on how to identify the programme – ***Study programme name (type, level, SP Register code and SP Register entry code)***. Codes should be retrieved from the Register of Study Programmes (SP Register). If the *SP Register code* and the *SP Register entry code* for a particular study programme are identical, please only add the code once. If they are not identical, please add both codes. Examples of correct programme identification:

- identical *SP Register code* and *entry code*

Psychology (undergraduate university study programme, 292)

- not identical *SP Register code* and *entry code*

Electrical Engineering and Information Technology (undergraduate university study programme, 51, 2812)

Evaluated year – N, when used in a table, it **refers to the academic or calendar year when the evaluation is conducted and is the last year for which the HEI has confirmed they have a full set of data**. The periods for which data are required are included in the names of the tables. As a rule, these are the last 3 or 5 years, including the year which has been chosen as the evaluated year.

ANNEX I. (EVIDENCE OF FULFILMENT OF QUANTITATIVE LEGAL REQUIREMENTS)

Table 1a. Teacher-student ratio (must not exceed 1 : 30) at the higher education institution (Art. 12, Par. 8 and 9 of the AQAHES)

The ratio between the total number of enrolled students and the total number of full-time teachers and those with nominal teaching titles shall not exceed 30:1. When calculating the ratio, the number of working hours of teachers who are not employed full time is added up to the number of working hours required of a full-time teacher. A complexity coefficient of 1 is used for teachers, 0.75 for senior assistants and 0.5 for assistants. A complexity coefficient of 0.5 is used for teachers with nominal teaching titles. A complexity coefficient of 1 is used for full-time students and 0.5 for part-time students.

Total number of students studying full time at all study programmes (Coefficient 1)	1141
Total number of students studying part time at all study programmes (Coefficient 0.5)	0
I. TOTAL NUMBER OF STUDENTS:	1141
Total number of teachers at the higher education institution (Coefficient 1)	144
Total number of senior assistants at the higher education institution (Coefficient 0.75)	3
Total number of assistants at the higher education institution (Coefficient 0.5)	10,5
Total number of nominal* teachers at the higher education institution (Coefficient 0.5)	0
II. TOTAL NUMBER OF TEACHERS AT THE HEI:	157,5
TEACHER (II.) /STUDENT (I.) RATIO	7,24

*This refers to nominal teachers in the current academic year. If the nominal teacher is working at more than one HEI, the coefficient of 0.5 may only be used for one HEI.

Table 1b. Value of all types of direct instruction included in the study programme (Art. 12, Par. 2 of the AQAHES)

For the purpose of initial accreditation of study programmes, the higher education institution shall provide full-time employment on an indefinite term basis for teachers who deliver at least 50% of all forms of direct instruction in the case of university study programmes, i.e. 35% of all forms of direct instruction in the case of professional study programmes.

Table 1c. Space and equipment* (Art. 12, Par. 1 and Art. 10, Par. 3 of the AQAHEs)

The higher education institution shall ensure a minimum of 1 m² of space per student. The minimum space per student requirement is calculated by comparing the total space taken up by classrooms, laboratories and other spaces intended for teaching with the total number of students enrolled at the higher education institution.

The higher education institution shall ensure an adequate supply of computers to be made available to students, as well as wireless internet access in all rooms intended for students.

* The data refer to the entire HEI because it is not possible to provide data on a single study programme.

Table 1d. Teachers employed in the field in which the higher education institution offers study programmes (Art. 10, Par. 5 of the AQAHEs)

A university without constituent units with legal personality shall employ a minimum of 21 full-time teachers in scientific-teaching, i.e. artistic-teaching positions. At least three teachers shall be employed for each field in which the university offers study programmes. A faculty or arts academy shall employ a minimum of seven full-time teachers in scientific-teaching, i.e. artistic-teaching positions, three of which shall be employed in each field in which the faculty or arts academy offers study programmes. A polytechnic shall employ a minimum of seven full-time teachers in teaching positions, three of which shall be employed in each field in which the polytechnic offers study programmes.

SCIENTIFIC/ARTISTIC FIELD* IN WHICH THE HEI OPERATES	NUMBER OF TEACHERS EMPLOYED IN A POSITION/TITLE** IN THE SCIENTIFIC/ARTISTIC FIELD
Architecture and urbanism	77
Design	8

* A scientific/artistic field in which the HEI operates is any field in which the HEI offers a study programme.

** Universities, faculties and academies provide the number of teachers in scientific-teaching, i.e. artistic-teaching positions, while polytechnics provide the number of teachers in teaching positions.

Learning outcome number/code	Learning outcome description
P01 A+U	creatively apply knowledge and methods within the field of technical sciences and arts, social and natural sciences in architectural design and urban planning solution which fulfils technical and esthetical demands
P02 A+U	to identify responsibility of an architect towards protection of natural and built environment
P03 A+U	to choose information and criteria necessary for the development of a architectural or urban design solution.
P04 A+U	to demonstrate knowledge of the language, principles, basic typological and theoretical concepts that articulate and express ideas in the discipline or architecture and urban planning
P05 A+U	to identify universal principles from examples in architectural history that give the basis, prove or entice contemporary design decisions
P06 A+U	to suggest an architectural, urbanistic or landscape solution according to the specified project programme of medium complexity which can be identified in an actual context.
P07 A+U	to produce and organize parts of documentation of an architectural and urbanistic project or parts of the documentation for physical planning
P08 A+U	during collaboration on the development of an architectural and urbanistic project, suggest adequate use of materials, technologies, technical and structural solutions with the aim of achieving sustainability and meeting the necessary requirements for the building
P09 A+U	to apply knowledge about solutions within the field of building physics, technological and functional solutions in order to achieve protection from weather and acceptable microclimate conditions.
P10 A+U	to apply knowledge about organisation, technology and legislation of building
P11 A+U	to critically evaluate designed or built rchitectural design or urban planning work
P12 A+U	to demonstrate visual and technical culture when applying tools for the development and presentation of an architectural and urbanistic project
P13 A+U	to precisely present an architectural and urbanistic project, graphically, textually and verbally .
P14 A+U	to collaborate on interdisciplinary projects and in research teams on professional, scientific and artistic projects
P15 A+U	to be eligible for enrolment in a graduate study programme in the field of architecture and urban planning.
P16 A+U	to apply values of professional ethics

D01 A+U	creatively apply knowledge and methods within the field of technical sciences and arts, social and natural sciences within research process, designing and building of architectural and urban planning solution which fulfils technical and aesthetic demands.
D02 A+U	to creatively choose principles of sustainable design when making architectural or urban design decisions.
D03 A+U	to develop the architectural or urban design project programme that can be identified in actual, everyday life
D04 A+U	to develop research within recognised thematic frame through architectural or urban design project
D05 A+U	to independently create an architectural and urbanistic project which , as part of complex project programme, interprets physical, social, technical and cultural dependencies using research in an actual context
D06 A+U	to interpret theoretical concepts that use universal principles to argue on behalf of contemporary design decisions.
D07 A+U	to design a concept design and to prepare project documentation for the protection and revitalisation of historic

	thematic sections and restoration of individual buildings.
D08 A+U	during development of a project to select an appropriate structure solution, material, technical, installation, transportation and security systems with the aim of achieving sustainability and fulfilling essential requirements in relation to the building, and the protection of its users, the building itself and the environment
D09 A+U	to integrate knowledge about solutions within the field of building physics, technological and functional solutions in order to achieve protection from weather and acceptable microclimate conditions.
D10 A+U	to independently design and organize parts of documentation of an architectural or urbanistic design project or parts of the documentation for physical planning and to join them into a design project whole.
D11 A+U	to identify the basic principles and the legal and financial framework of organising a professional practice and managing projects.
D12 A+U	to coordinate knowledge about organisation, technologies, building procedures and legislation in order to organize, plan and monitor building activities.
D13 A+U	to lead the work of an interdisciplinary project and research team of experts, to integrate work results in the development and performance of the project
D14 A+U	to be eligible for enrolment of a postgraduate artistic or scientific study programme in the field of architecture and urban planning.
D15 A+U	to plan and develop personal competences through continuous monitoring of achievements and by participation in the available training programmes in the field or architecture.
D16 A+U	to defend principles of professional ethics within professional responsibilities of an architect

* For HEIs which deliver double-major programmes two values need to be provided:

- students taking double-major programmes are included twice,
- the total number of students at the HEI must be in brackets, and the number of students taking double-major programmes is multiplied by 0.5.

Table 3.2. Structure of enrolled students and interest in first-cycle study programmes* in the evaluated academic year and two academic years prior to that

NOTE:

Data on structure of students refer only to students applying for, i.e. enrolling in study programmes via the State Matura system (*National Information System of Application to Higher Education Institutions - NISpVU*) and includes only first-time enrolments in the first year of studies (not students who are re-taking the year).

1. The term “publication” in this table refers to reviewed publications whose authors include at least one HEI staff member at the time the publication was produced (this author has a valid employment contract and/or is employed at the HEI as an external associate, working on the research described in the publication in question and using the HEI research infrastructure for this purpose). As a rule, the author’s affiliation provided in the publication is with the HEI.
2. “Publications published in cooperation with other institutions in Croatia” include only publications whose co-authors include at least person who is affiliated with another institution.
3. “Publications resulting from international cooperation” include only publications whose co-authors include at least one person who is affiliated with an institution from outside of Croatia.
4. Open access is free, non-paywalled and unrestricted online access to digital scientific information, which allows users to read, store, share, search, retrieve and index said information and/or use it in any other lawful form. This is most commonly achieved by storing certain versions of publications in institutional repositories (Green OA) or publishing in journals which are immediately available as open access (Gold OA). In this context, free means permanently free from any restrictions and conditions regarding access and use. In other words, open access publications include all those which are immediately available online, free of charge, to anyone, without the need for authentication or the imposition of any time restrictions in order to access the full text of the publication.
5. Includes original scientific papers, review (scientific) papers, preliminary communications, short communications, case reports and scientific letters published in journals indexed in the following Web of Science Core Collection (WoSCC) citation indices: Science Citation Index Expanded (SCI-EXP), Social Science Citation Index (SSCI) or Arts and Humanities Citation Index (A&HCI).
6. Includes original scientific papers, review (scientific) papers, preliminary communications, short communications, case reports and scientific letters published in journals indexed in the WoSCC Emerging Sources Citation Index (ESCI).
7. Includes original scientific papers, review (scientific) papers, preliminary communications, short communications, case reports and scientific letters published in journals indexed in the Scopus bibliographic and citation database, not including those indexed in the WoSCC citation indices mentioned above.
8. Includes original scientific papers, review (scientific) papers, preliminary communications, short communications, case reports and scientific letters published in journals indexed in the EconLit or HeinOnline bibliographic databases, not including those indexed in the WoSCC citation indices mentioned above and/or in Scopus.
9. Includes original scientific papers, review (scientific) papers, preliminary communications, short communications, case reports and scientific letters published in journals which are not indexed in WoSCC citation indices, Scopus, EconLit or HeinOnline.
10. Includes professional and review (professional) papers published in journals indexed in the following WoSCC citation indices: SCI-EXP, SSCI or A&HCI.
11. Includes professional and review (professional) papers published in journals indexed in the WoSCC citation index ESCI.
12. Includes professional and review (professional) papers published in journals indexed in the Scopus bibliographic and citation database, not including those indexed in the WoSCC citation indices mentioned above.
13. Includes professional and review (professional) papers published in journals indexed in the EconLit or HeinOnline bibliographic databases, not including those indexed in the WoSCC citation indices mentioned above and/or in Scopus.
14. Includes professional and review (professional) papers published in journals which are not indexed in WoSCC, Scopus, EconLit or HeinOnline.
15. Includes original scientific papers, review (scientific) papers, case reports, preliminary communications and short communications published in edited books.
16. Includes professional and review (professional) papers published in edited books.
17. Includes original scientific papers, review (scientific) papers, case reports, preliminary communications and short communications published in conference proceedings.
18. Includes professional and review (professional) papers published in conference proceedings.
19. Includes scientific and professional author monographs, textbooks, dictionaries, manuals, lexicons, catalogues and atlases published outside of Croatia.
20. Includes scientific and professional author monographs, textbooks, dictionaries, manuals, lexicons, catalogues and atlases published in Croatia.
21. Includes scientific and professional edited monographs, edited collections, conference proceedings, textbooks, dictionaries, manuals, lexicons, encyclopaedias, anthologies, yearbooks, catalogues and atlases published outside of Croatia.
22. Includes scientific and professional edited monographs, edited collections, conference proceedings, textbooks, dictionaries, manuals, lexicons, encyclopaedias, anthologies, yearbooks, catalogues and atlases published in Croatia.
23. Includes translations of scientific and professional monographs, textbooks, dictionaries, manuals, lexicons, catalogues, atlases and literary works.
